SPRING 2027 SEMESTER COURSES
HIGH SCHOOL

AI for Academic Empowerment | WEDNESDAYS 10:05-11:05

This course empowers students to use Artificial Intelligence ethically and effectively as a tool for academic and career success. Participants explore AI's capabilities in research, study, and content creation through project-based learning.

Cost: $350 **| Instructor:** Maggie Bokros

NEW! **Cooking Through U.S. History | TUESDAYS 1:45–2:45**

Travel through major periods of U.S. history and prepare foods that help tell the story of each era—from Indigenous food traditions and colonial kitchens to westward expansion, immigration, and wartime rationing. Students will build practical cooking skills while exploring how food connects to American history.

Cost: $550 **| Instructor:** Ryan Bokros

Digital Foundations: 3D Printing/CAD | WEDNESDAYS 12:40-1:40

This one-semester CAD/3D Printing course introduces students to the fundamentals of 3D printing, including how printers work, basic design principles, and the process of turning ideas into physical objects. Students will learn foundational CAD skills with a focus on designing models specifically for 3D printing. Throughout the course, they will apply what they learn through hands-on projects that can be printed at school or at home if they have access to a 3D printer. (Computer or Pro Level Tablet required)

Cost: $450 **| Instructor:** Ryan Bokros

Economics | WEDNESDAYS 11:10-12:10

Designed as a natural successor to Government, this course explores fundamental principles of micro and macroeconomics. Students analyze how choices are made regarding resource allocation, market trends, and financial stability.

Cost: $475 **| Instructor:** Maggie Bokros

NEW! **Floral Arrangement Workshop | MONDAYS 12:45-1:45 (4 week session)**

Bring a little spring to life with flowers! Students will explore colors, textures, and floral design while learning how to arrange fresh flowers and greenery. Each week, they'll get creative and put together beautiful bouquets to take home. *April 3-24*

Cost: $150 + $20 supply fee **| Instructor:** Kristin Collins

Food Science | MONDAYS 11:10-1:10

This highly interactive, discussion-based course offers hands-on exploration of the science behind food through partnered lab experiments. Topics include microbiology, chemistry, thermodynamics, and food psychology. Lab supplies are included in the tuition.

Cost: $550 **| Instructor:** Ryan Bokros

Intro to Logic | THURSDAYS 1:45-2:45

Students learn to reason with clarity by mastering 28 logical fallacies to filter through messages in advertising and social media. It provides a lifetime framework for evaluating truth and validity.

Cost: $550 **| Instructor:** Janice Wright

Intro to Physics with Rocketry | TUESDAYS 1:45-2:45

This high-energy course applies laws of motion and thermodynamics to rocket design and flight. Students calculate trajectories and aerodynamics through hands-on building projects and model launches. Super fun field trips include; iFLY, Daikin Park & Kemah Boardwalk!

Cost: $550 + $250 supply fee **| Instructor:** Janice Wright

Senior Seminar | TUESDAYS 11:10-12:10

Designed as a capstone experience, this course focuses on the transition from high school to adulthood, including life skills, time management, and goal setting. It serves as a space to finalize portfolios.

Cost: $375 **| Instructor:** Maggie Bokros

Teen Wealth Builder | WEDNESDAYS 9:00-10:00

This practical financial literacy course covers long-term wealth creation and investment strategies. Participants learn about compound interest, the stock market, and diversified assets.

Cost: $450 **| Instructor:** Maggie Bokros

NEW! **The Consequence of Ideas: Introduction to Philosophy | TUESDAYS 12:40-1:40**

How have the ideas of great philosophers shaped the world we live in today? In this one-semester introductory philosophy course, students will study the lives, ideas, and writings of major philosophers throughout history. The goal of the course is not simply to learn what philosophers believed, but to understand why their ideas mattered, how those ideas changed the course of history, and how they continue to influence the world today. No prior experience with philosophy is required.

Cost: $550 **| Instructor:** Janice Wright

NEW! **Voice Masterclass | THURSDAYS 1:00-2:00 (individual sessions)**

Ready to build confidence and discover your voice? Sign up for a one-hour private vocal lesson, tailored to your student's individual goals and interests. Sessions include proper breathing techniques, pitch matching, vocal development, and learning how to belt safely and effectively. Students can explore any genre of music they enjoy, from musical theater and pop to classical and contemporary styles. Whether you're a beginner or looking to strengthen your existing skills, let's work together to develop your voice!

Cost: $50 per session **| Instructor:** Holly Jasso

Writing a College Admissions Essay | MONDAYS 1:45-2:45

In this focused writing course, students learn how to craft a compelling and authentic college admissions essay that highlights their unique experiences, strengths, and goals. Students develop their writing through brainstorming, drafting, revising, and individualized feedback while building the skills needed to communicate their story with clarity and confidence.

Cost: $475 **| Instructor:** Julie Hart
